Dear

STAND OUT FROM THE CROWD...

With the Government agenda for the increase of Apprentice style learning, Staffordshire University are delighted to announce the development of two year Apprenticeship positions for students finishing Year 11 this year, within our own University departments. These placements are the perfect opportunity for successful applicants to 'earn while they learn'.

With the ability to choose between four distinct areas, Business Administration; Catering; Finance and Accounting and Sports Science Technician, students have the chance to work and learn within a professional University department and continue with their education by taking an appropriate vocational qualification.

Attached is a leaflet giving some more details and informing you where and how students can register their interest in this fantastic opportunity.

Yours sincerely

Tim Fuller
